ABSTRACT

This 1999-2000 directory provides information on Alaska's public schools, school districts, education organizations, and institutions of higher education. A statistical summary indicates that in 1998-99, Alaska enrolled 132,905 students in 503 public schools. Breakdowns by grade configuration and enrollment show that about half the schools served grades preK-12, and about half enrolled 150 or fewer students. Ninety schools served fewer than 26 students. The first sections of the directory list state school board members; provide contact information, e-mail addresses, and Web site addresses for school districts and state-operated schools; and list contact persons and telephone numbers for divisions and subdivisions of the Alaska Department of Education & Early Development and for various statewide education programs. The main directory lists school districts with their individual schools. District information includes address, phone number, fax number, district identification number, enrollment in October 1998, and name of superintendent. School information includes address, phone number, fax number, school code, grades offered, and name of principal or head teacher. Information on Alaska's four state-operated schools is also given. Final sections provide contact information for colleges and campuses of the University of Alaska, private colleges, and state education organizations. (Contains an index of people and institutions.)
